

# DEFENDER MARATHON

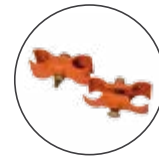

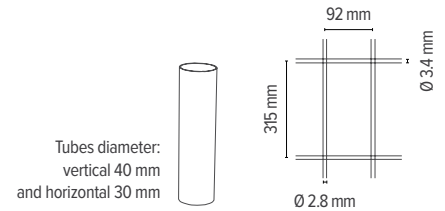

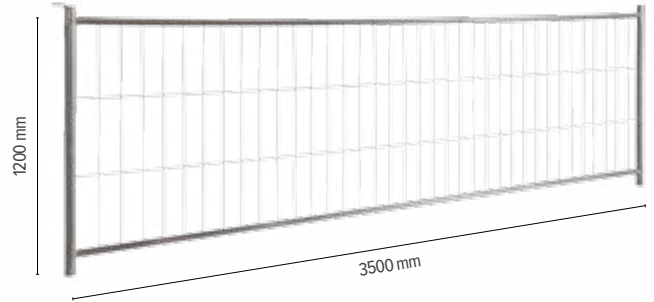

This fence is similar to DEFENDER HD style, suiting particularly working areas and construction worksites. Due to its characteristics, the panel is used also for crowd delimitation during sport and leisure events. This fence installation is very easy and quick and due to its reduced height of 1200 mm the system grants a good visibility.

## APPLICATIONS

- > Building worksites
- > Work in progress areas
- > Sports and leisure events
- > Trade fairs

## PRODUCT SPECIFICATIONS

Working site temporary fence 1200 mm high and 3480 mm long, made by a frame of two vertical tubes 40 mm diameter and two horizontal tubes 30 mm diameter welded to one infill mesh panel sized 315x92 mm, wire 2.8 mm. The fence supports are in CLS (cement) or CLS orange colour plastic coated.

Security Joints

CLS & ABS bases  
with 38 mm holes
